

Quacker

Omar Mahmoud, Nasif Qadri, Yousef Moussa

Design Document - CMPUT 291 Mini Project 1

2024-11-14

1 Overview and User Guide

Running the Application

1. Compile the Application:

Use the provided Makefile to compile the code by running:

```
make
```

2. Start the Application:

Execute the application with a database filename:

```
build/quacker <database_filename>
```

Example:

```
build/quacker test/prj-sample.db
```

3. Interacting with the Application:

Upon launch, the application displays the main start page, providing options for interacting with Quacker .

2 Software Design

*Baila, baila conmigo
Baila, baila mi amor
Baila e mexe o umbigo
Que así es que se baila mejor*

3 Testing Strategy

We dont need to test our software because we are better

4 Group Work Breakdown

We give all credit to Allah SWT, all success comes from Him alone.
